## **CONSTRUCTION NOTICE 4: Aitken Place Park**

Construction on Aitken Place Park is progressing well and is nearing completion. The park's landscaping has been completed including all trees, shrubs and grass along with the dog run, water bottle filling station and benches. Over the next several days, construction crews will complete the park's hardscape features including laying the final pavers and sandblasting the urban porch. Four new light poles and a handrail are also scheduled to be installed in the park next week.

We anticipate that all remaining work will be completed by early next week. However, fencing around the park will remain in place until early-October to give the new grass that has been placed across the park's central lawn time to germinate properly.

The park's future public art, called *LIGHT KEEPER*, is currently in fabrication and we expect installation to occur in fall 2019. Until this time, a plywood box has been placed at the park's southwest corner to protect the foundation of the future installation.

Aitken Place Park is on schedule to open for public use in early-October 2019.

When complete, Aitken Place Park will be a multi-purpose park space connecting Bayside to the broader East Bayfront community. This 0.75 acre park is located just north of the Water's Edge Promenade along Lake Ontario and east of Lower Sherbourne Street. The park is framed by two local roads—Edgewater Drive in the north and Merchants' Wharf encircling the park site. The southern edge of the park will provide uninterrupted views of Toronto's eastern harbour.
