

Beanfield Metroconnect

Based in Toronto, Beanfield Metroconnect is a pioneering Canadian telecommunications company. Established in 1988, Beanfield has built and operates a large fibre-optic network in downtown Toronto, providing service to more than 200 commercial buildings.

Beanfield utilizes its network to provide both wholesale and retail telecommunications services to an impressive and diverse client roster, including: Shaw, TELUS, Rogers, HydroOne Telecom, France Telecom, Corus Entertainment, Exhibition Place, Wind Mobile, Globalive, Hibernia Atlantic, and a number of major financial institutions.

The company offers the largest available range of commercial services and tailors service packages to the individual requirements and budget of each customer, from small one person businesses to a multi-national organizations. Beanfield operates its network without the use of third parties or outside contractors, allowing it to provide customers the most efficient, flexible, and cost-effective services possible.

In addition to their commercial service offering, Beanfield provides wholesale services to a number of telecommunications providers, which use Beanfield's existing network to reach their customers.

Beanfield was instrumental in helping to build the thriving technology and media hub in Toronto's Liberty Village neighbourhood. The company built its first community-wide commercial network in Liberty Village in the 1990s. Their project began by connecting offices within a single building and eventually expanded to connect the entire neighbourhood. Today, Liberty Village is recognized as one of the most connected commercial communities in the city, and is home to many major technology and media companies who are all Beanfield customers, including Zoomer Media, Sirius Satellite Radio, IMAX, and Vision TV.

The privately held firm is managed by Dan Armstrong, founding partner and chief executive officer, and Chris Amendola, partner and chief operating officer, both of whom have extensive local knowledge and industry-leading expertise.
