WEAVING THE MULTIPLE WATERFRONT PARTS

PRIMARY WATERFRONT + FLOATING WATERFRONT + BOULEVARD & SLIP-ENDS

Underground Processes:
Running the length of the Martin Goodman Trail (3), an infiltration/ filtration gallery (5) will catch the surface water run-off from the bike trail and the public promenade (9). Dec down, a new Sanitary Interceptor (7) would receive the downtown core combined sewer transmit it to the Converted Silo building for treatment.

DISCUSSION WORKSHEETS

1. Do you live, work or visit the Central Waterfront Area

live

work

visit

2. Please indicate on the map:

- a) the *“centre”* or *“heart”* of the central waterfront (please circle)
- b) The route that you typically take for a leisure walk, run, cycle or drive (please mark your routes)
- c) The area(s) where you might stop along the route (please mark with a green sticker)
- d) The area(s) where you may have encountered barriers or challenges (please mark with a red sticker)
- e) The area(s) you like best (please place a ✓)
- f) The area(s) you like least (please place an X)

Please use this map to aid you in answering Question #2

DISCUSSION WORKSHEETS

4. Heads of Slips

The overall design envisions the “heads of slips” as important public spaces that could, for example, be designed to reflect the nearby diverse, unique and characteristic neighbourhoods and the streets that terminate at the waterfront. The design has proposed a theme for each “head of slip” .

For each “head of slip” please indicate how you would like to see each space themed to relate to its neighbourhood and context:

Portland Slip _____

Spadina Slip _____

Peter Slip _____

Rees Slip _____

Simcoe Slip _____

York Slip _____

Yonge Slip _____

Jarvis Slip _____

Parliament Slip _____

DISCUSSION WORKSHEETS

Any Other Comments?

Please use this space to record any additional comments.

PLEASE RETURN completed workbooks by February 6, 2007 to:
