## **CONSTRUCTION NOTICE 3: Aitken Place Park**

Construction on Aitken Place Park began in the fall of 2018. Over the last several months, construction crews have completed all below grade infrastructure and have since commenced installing the irrigation system and electrical infrastructure for future park lighting. A new children's playground and dog relief area have recently been installed, and crews have completed seating at the park's northern overlook and laid the foundation for a future public art installation called *LIGHT KEEPER*.

Over the next several weeks, crews will continue to install many of the park's hardscape features including concrete pavers, stairs, ramps and concrete walkways. Park benches and other seating features will also be installed, along with perimeter fencing for the dog relief area located at the north end of the park. The park's landscape will begin to take shape as crews continue to place planting soils throughout the park's slopes and planter boxes before placing trees and shrubs throughout.

Aitken Place Park is scheduled to be complete and open for public use in early-October 2019.

When complete, Aitken Place Park will be a multi-purpose park space connecting Bayside to the broader East Bayfront community. This 0.75 acre park is located just north of the Water's Edge Promenade along Lake Ontario and east of Lower Sherbourne Street. The park is framed by two local roads—Edgewater Drive in the north and Merchants' Wharf encircling the park site. The southern edge of the park will provide uninterrupted views of Toronto's eastern harbour.
