CONSTRUCTION NOTICE #4: IN-WATER PIPES IN EAST BAYFRONT

Background

Waterfront Toronto has begun work on the final piece of a large Stormwater Management System that services East Bayfront, the West Don Lands and future communities north of the Keating Channel.

The final piece includes construction of in-water pipes along the section of the Water's Edge Promenade spanning the foot of Sherbourne Common from approximately Dockside Drive to the southern point of 15 Merchants' Wharf, also known as the Aqualina at Bayside condos. When complete, the in-water pipes will help convey stormwater to the Cherry Street Stormwater Management Facility where it will be treated to remove pollutants before the water flows to Lake Ontario.

Update:

Weekend Construction

On Saturday, December 18, 2021, our contractor, Clearway, plans to continue drilling and excavation work for rock sockets pending appropriate weather conditions. Rock sockets are metal poles drilled deep into the surface to provide support to a larger structure. Once complete, the rock sockets will help to support the in-water pipe on the waterside of the Water's Edge Promenade.

As per the City of Toronto's bylaw, construction work on Saturday will take place between the hours of 9am-5pm on the waterside of the Water's Edge Promenade and vessels will be present on the water.

Drilling work for the rock sockets began on Monday, October 18 and is expected to be complete on January 17, 2022 with work occurring between 7am – 7pm Monday to Friday.

What to expect

- Moderate noise is expected.
- Vessels and cranes will be present in the water during this work.
- Pedestrians and cyclists will still have access to the full length of the WEP during this time.
- There are no anticipated impacts to parking or traffic in the area.

Timeline

Construction is expected to be completed by June 2022.

About the Stormwater Management System

For more information about the Stormwater Management System, the Cherry Street Stormwater Management Facility and how the in-water pipes connect to this system, please refer to [this post](#).
